Wireless fixed outdoor IP camera

AILELFI4U1

**Easy QR code**  
setup

**Android and iOS**  
application included

**Video management**  
software included

**High definition**  
720p/1.0MP

**IR LEDs**  
for night vision

**Indoor/Outdoor**  
IP66 all-weather security

Quickly start viewing live video right from your smartphone or tablet

## Product overview

Nexxt Solutions introduces its new generation of high definition wireless outdoor IP cameras. These one megapixel cameras may now achieve a 720p HD resolution for clear facial identification and true color replication. Combined with wireless capabilities, these cameras become a powerful asset for monitoring areas of interest without the hassle of having to run cables or be attached to the location of a router or switch. Easy setup and installation for remote access and can be quickly configured thanks to the inclusion of P2P networking and a QR code scan feature – power up the device, take a picture of the QR code, and let the application do the rest.

The Xpy1210 is an all metal outdoor weatherproof IP camera which comes with High definition 1/4-inch CMOS image sensor and a 2.8mm fixed lens. Integrated IR LED lights permit for clear night vision monitoring in complete darkness. Recording and playback can also be pointed to an FTP server or to a local network folder. The built-in connectors support seamless two-way communication. The included application runs on both Android and iOS platforms, which supports advanced features such as motion detection and email notifications. Not only can you see what is happening in real time but provide a complete sense of security when away from your home or business.

## Highlights

- HD wireless outdoor IP camera
- 720p / 1.0MP
- IEEE 802.11n wireless connection
- H.264 compression
- IP66 all metal housing for outdoor use
- IR LEDs for night vision
- Two-way communication
- Supports P2P connection
- Privacy zone setup
- Motion detection alarm via email
- Embedded DDNS
- Video management software included
- Includes alarm in and out port
- Easy QR code setup
- Android and iOS application included
- Three year warranty

## Technical specifications

Xpy1210	
<b>Camera</b>	
Image sensor	High definition 1/4-inch CMOS
Lens	2.8mm fixed
IR LED quantity	30
Minimum illumination	0 lux with IR
Night vision range	20m
IR cut filter	IR cut filter with auto switch
Termination(s)	RJ45
Dimensions	6.5x2.6x2.6in
Weight	0.9lb
<b>Video/Image</b>	
Resolution	720P / 1MP
Compression	H.264
Effective number of pixels	1280(H)x720(V)
Viewing angle	75°
Frame rate	Up to 25fps
Mirror/Flip	Included
Features	Quick Sync, motion detection, sound detection, Onvif
<b>Audio</b>	
Communication	Includes connectors to support two-way audio
Compression	PCM/G.726
Input	3.5mm
Output	3.5mm
<b>Network</b>	
Interface	One 10/100Mbps RJ45 port
Supported protocols	Onvif, P2P, DDNS, IP, TCP, UDP, HTTP, HTTPS, SMTP, FTP, DHCP, UPnP, RTSP
Dynamic DNS	Included
Firewall security	Supports IP filtering
Port forwarding	P2P, UPNP
Stream	Dual stream
DHCP	Automatic
<b>Wireless</b>	
Standards	IEEE 802.11n: 150Mbps IEEE 802.11g: 54Mbps IEEE 802.11b: 11Mbps
Frequency	2.4GHz
Antenna(s)	One, omnidirectional
Antenna gain	2dBi
Network security	WEP, WPA, WPA2
<b>Surveillance management</b>	
Remote management	Included
Multiple user management	Up to 4
Split screen view	9 frames
Mobile app	Android and iOS
<b>Alarm and notifications</b>	
Motion detection	Included
Notification method	Alarm via email and snapshot uploads to FTP
Notification scheduling	Time-scheduled
<b>Additional information</b>	
Warranty and tech support	Three years
Certifications	FCC
Browser compatibility	Microsoft IE8 and above, Mozilla Firefox, Google Chrome, Apple Safari
Minimum system requirements	Windows 7, Mac OS, iOS, Android
Power	12V/1A
