

## « WIRELESS-N BROADBAND ROUTER »

The Stealth 150 Wireless-N Router incorporates the latest MIMO technology (Multiple Input Multiple Output) that makes your wireless connection up to 3x faster than the standard 802.11g. Built for speed, the Stealth 150 delivers high performance for smooth streaming of video, high frame-rate gaming, fast data transfers, and heavy Internet use from multiple users, all with great range. It also connects to your existing Wireless-G devices. This Router makes it easy to set up your wireless network at home or office without professional help, thanks to an Installation Wizard CD-ROM, which walks you through the easy step-by-step installation process. Support for WPA and WPA2 ensures the usage of the best possible encryption available today. In addition, it supports two Wi-Fi Protected Setup (WPS) encryption methods: PBC and PIN.

### » FEATURES

**WDS** relays data among multiple Nexxt routers, offering you a user-friendly scalable solution you can always rely on.

The **WDS** can be configured as a:

- Wireless Access Point
- Point-to-Point (PtP) bridge
- Point-to-Multipoint (PtMP) bridge
- Repeater for range extension
- Wireless Client

### » Description

- High-gain internal antenna
- 150 Mbps Wireless-N router with built-in antenna
- IEEE802.11n, IEEE802.11b/g supported
- 1 10/100M WAN + 4 10/100M LAN provided
- WPS, WPA2, WPA, WEP encryption methods
- QoS for bandwidth control supported
- Quick Setup Wizard to install router in seconds
