

« 2.4 GHz OMNI-DIRECTIONAL 7dBi INDOOR ANTENNA »»

This powerful antenna is made to provide extended coverage for an existing 802.11b/g wireless network. With its omni-directional design, it offers increased wireless signal strength in every direction. Easily connects to the vast majority of wireless routers and access points currently available on the market. Enjoy the benefits of wireless connectivity at greater distances throughout your home or small office with this versatile and durable antenna.

»» FEATURES

- Works with wireless devices that have removable antennas
- N standard offers backward compatibility with 802.11a, 802.11b and 802.11g devices
- Easy installation: just screw the antenna's RP-SMA connector onto your router or access point's base
- 360 degrees of enhanced signal coverage for your home or small office
- Boosts your signal strength, operating distance, and the overall performance of a wireless network

»» SPECIFICATIONS

- **Frequency:** 2400-2483 MHz /5150-5850 MHz
- **Gain:** 7 dBi
- **Voltage Standing Wave Ratio:** ≤ 2
- **Polarization:** vertical
- **Maximum power:** 200 W
- **Impedance:** 50 Ω
- **Connector:** RP-SMA/SMA
- **Dimensions (height):** 270mm
