Modular Crimping Tool
# (RJ45/8P8C, RJ12/6P6C, RJ11/64C, 6P2C)

This modular crimping tool makes installation a snap. This all-in-one tool lets you easily terminate 8P8C/RJ45, 6P6C/RJ12, 6P4C/RJ11 & 6P2C Plugs with paired-conductor cables for voice and data applications. Trim and strip cords with precision in one motion, for consistent, high quality connections. This tool includes two crimp cavities suitable for 6 and 8 position modular plugs. It features a heat-treated carbon steel frame with black oxide finish for superior durability, a safety blade guard, and comfort grip handles that help reduce fatigue.

AW250NXT05

FEATURES
- Cable cutter and stripper.
- Head-treated carbon steel frame.
- Safety blade guard.

INSTRUCTIONS
1. Squeeze handles and open the lock.
2. Cut the modular cable to the desired length. Make certain that the end are cut squarely, not diagonally.
3. Insert cable between stripper blades. Squeeze handles, cable must be keep perpendicular and then pull from the tool.
4. Remove the outer jacket, insert the stripped cable into the plug, and make sure the left wire at one-end matches the right wire at the other end.
5. Place modular plug with cable into the tool`s holder. Make sure the stripped wire is between the tab and gold contacts. Squeeze handles until it stops.
